

Only Me

Private · Local · Only Yours

Your all-in-one personal tracker — tasks, finances, events, gym, snapshots, notes, links, vault & expenses.

No account. No cloud. No ads. Everything stays on your device.

onlyme.app · v1.0 · Android

All data stored locally on your device

Tasks

Habits & Reminders

“

Stay on top of every to-do with smart reminders and streak tracking. Build daily habits and watch your consistency grow — day after day.

Create tasks with title, time, and custom category icons

Set date/time reminders — even in alarm mode (bypasses silent)

Streak counter to track consecutive daily completions

Filter by Today, Upcoming, or All tasks

Swipe to delete with a friendly confirmation

Accent colour per task for visual organisation

Finance

Debt & Money Tracker

“

Know exactly who owes whom. Track borrowed and lent money in both directions, log partial payments, and see your net financial position at a glance.

Track 'I owe' and 'They owe' debts separately

Net-position card — green when positive, red when negative

Quick-pay amount chips for instant payment logging

Mark debts as settled when fully paid

Works with any currency symbol (■ \$ € £ ¥ or custom)

Full payment history per debt entry

Events

Plan & Budget Events

“

Plan ahead for every occasion. Build a budget checklist for each event, track estimated vs actual spend, and never miss an important date with smart reminders.

Countdown timer — days remaining until your event

Budget checklist with estimated and actual cost per item

Mark checklist items complete as you spend

Real-time budget summary (estimated vs. spent)

Day-before and at-time notifications with alarm mode

Horizontal event carousel for quick browsing

Gym

Weekly Workout Planner

“

Structure your entire training week in one place. Log every set, rep, and weight, track rest days, and visualise your body-weight progress with a built-in chart.

7-day plan with M-T-W-T-F-S-S day selector

Exercises per day with sets, reps, and weight fields

Mark exercises complete or flag the whole day as done

Body-weight log with timestamps (kg entries)

Line chart of weight history for visual progress

Mark days as rest days to keep your plan flexible

Snapshots

Visual Progress Journal

“

A private photo journal to track your personal progress visually. Capture or import photos, add notes, and browse your history by category — hair, body, or skin.

Three category tabs: Hair, Body, Skin

Capture new photos or pick existing ones

Gradient placeholder tiles when no photo is taken

Add a personal note to every snapshot

Full-screen overlay view on tap

Long-press to edit or delete any entry

Notes

Quick & Simple Notes

“

Capture thoughts the moment they strike. A clean, distraction-free note editor for anything from a quick reminder to a long-form idea — always private, always local.

Title and body text for every note

Instantly create a new note with one tap

Tap any note to edit inline

Swipe to delete with confirmation

Timestamped so you always know when you wrote it

No character limits — write as much as you need

Saved Links

Bookmark URLs

“

Save any URL with a friendly title and open it later in one tap. Never lose a useful link again — everything is stored offline, no sign-in required.

Save URL and title pairs instantly

Tap to open directly in your default browser

Auto-adds https:// if you forget the scheme

Swipe to delete with confirmation

Timestamps let you see when you saved each link

Fully offline — no external service needed

“

Keep your passwords safe and accessible without any cloud exposure. Passwords are encrypted on-device before storage and never leave your phone in plain text.

Encrypted password storage (XOR cipher, never plain text)

Title, username, URL, and note fields per entry

Eye-icon toggle to reveal or mask passwords

One-tap copy for username and password

Long-press to edit any vault entry

100% local — passwords never leave your device

Profile

Your Settings Hub

“

Personalise the app to match you. Set your name, birthday, and currency symbol, choose an alarm sound, manage notification permissions, and back up all your data.

Name, date of birth, and phone number storage

Currency symbol picker (■ \$ € £ ¥ + custom 3-char)

Custom alarm sound from your device's file system

Notification & battery-optimisation permission controls

Test notification to verify reminders work

Full data export & import (JSON backup)

“

Know exactly where your money goes every day. Log spending by category, filter by week, month, or year, and see trends in a clear bar chart — all in one place.

1

Add expenses with amount, category, and note

2

8 categories: Food, Transport, Shopping, Health, Bills & more

3

Filter by week / month / year / all-time

4

Daily summary cards with entry count

5

Tap category chips to filter the list instantly

6

Bar chart for visual spending trends over time
