Tasks

Habits & Reminders

“

Stay on top of every to-do with smart reminders and streak tracking.
Build daily habits and watch your consistency grow day after day.

Build daily habits with streak tracking

Smart date/time reminders with alarm mode

Custom category icons & accent colours

Filter: Today · Upcoming · All tasks

Swipe-to-delete with confirmation

Six views for full task control

Finance

Debt Tracker

“

Know exactly who owes whom. Track borrowed and lent money, log partial payments, and see your net financial position at a glance.

1

Track who owes whom in both directions

2

Net-position card (green positive / red negative)

3

Quick-pay chips for instant payment logging

4

Mark debts settled when fully paid

5

Any currency: ■ \$ € £ ¥ or custom

6

Full payment history per debt

Events

Plan & Budget

“

Plan ahead for every occasion. Build a budget checklist, track estimated vs actual spend, and never miss an important date.

1

Countdown to your next event

2

Budget checklist with estimated vs actual cost

3

Mark items complete as you spend

4

Real-time budget summary at a glance

5

Day-before & at-time alarm notifications

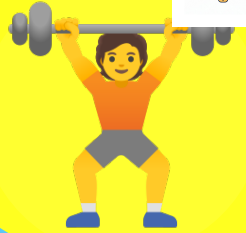

6

Horizontal carousel for quick browsing

Gym

Workout Planner

“

Structure your entire training week in one place. Log every set, rep and weight, track rest days, and visualise body-weight progress.

1

7-day plan with M-T-W-T-F-S-S selector

2

Log exercises with sets, reps & weight

3

Mark days complete or flag as rest days

4

Body-weight log with timestamps

5

Line chart of weight history

6

Delete exercises or whole days easily

Snapshots

Photo Journal

“

A private photo journal to track personal progress visually. Capture or import photos and browse history by category.

1

Three categories: Hair · Body · Skin

2

Capture photos or use gradient placeholders

3

Add a personal note to every snapshot

4

Full-screen overlay on tap

5

Grid tile layout with previews

6

Long-press to edit or delete

Notes

Quick Notes

“

Capture thoughts the moment they strike. A clean, distraction-free note editor — always private, always on your device.

Title and body text per note

One-tap to create a new note instantly

Tap to edit any note inline

Swipe to delete with confirmation

Timestamped creation dates

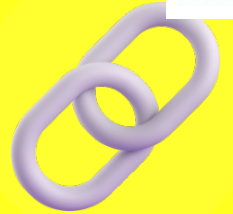

No character limits — write freely

Saved Links

Bookmarks

“

Save any URL with a friendly title and open it later in one tap. Never lose a useful link again — works fully offline.

1

Save URL + title pairs instantly

2

Tap to open in your default browser

3

Auto-adds https:// when missing

4

Timestamps show when you saved each link

5

Swipe to delete with confirmation

6

100 % offline — no service needed

Vault

Password Safe

“

Keep your passwords safe without any cloud exposure. Passwords are encrypted on-device and never leave your phone in plain text.

1

Encrypted storage — never plain text

2

Title, username, URL and notes per entry

3

Eye-toggle to reveal or mask passwords

4

One-tap copy for username & password

5

Long-press to edit any entry

6

All data stays on your device only

Profile

Settings

“

Personalise the app to match you. Set your name, birthday, currency, alarm sound, manage permissions, and back up your data.

1

Name, date-of-birth & phone storage

2

Currency symbol picker (5 presets + custom)

3

Custom alarm sound from your files

4

Notification permission controls built-in

5

Test notification to check reminders

6

Full JSON backup export & import

“

Know exactly where your money goes every day. Log spending by category, filter by period, and see trends in a clear bar chart.

1

Log amount, category & note per expense

2

8 categories: Food · Transport · Bills · ...

3

Filter: week / month / year / all-time

4

Daily summary cards with entry count

5

Tap category chips to filter instantly

6

Bar chart for visual spending trends
